ASAKUA work boats are designed and built for a wide range of marine, fishing, and rescue applications. Manufactured entirely from rugged high density polyethylene, they offer an impact resistant construction with exceptional performance handling, and stability.

### MAIN ADVANTAGES OF HDPE BOATS

The material is very easy to repair should the hull become damaged

The vessel does not require to be maintained inflated as with rubberized boats

The hull requires no painting or caulking

Hull and pontoons are oil and petroleum resistant

Able to construct with water tight deck and pontoons that have four bulk headed chambers

Each work boat has side and bottom fenders for side impact and beaching capabilities
